DESIGNED BY NATURE

There's nothing quite like the beauty of a wood floor. Its grain and texture bring a natural warmth to any interior, from bedroom to living room, kitchen to hallway. Tarkett's expertise in parquet dates back to the 1880s, and we've used that skill to craft a naturally stylish range of floors that are durable, recyclable and easy to install.

Whether you want the purity of soft and welcoming shades, vintage character or a bold, design-led look, our collection has a wood floor to enhance your home. In these pages you'll find advice on installation and details of co-ordinating accessories. There's also guidance on maintaining the wood and information about how we care for the forests from which that wood comes.

GENUINE CRAFTSMANSHIP SINCE 1886

That the story of Tarkett should have its roots in Sweden – a land rich in forests – is not so strange. From it has sprung a passion for wood and the skills of transforming it for the basic human needs of housing, furniture and flooring.

From the beauty of nature to the hand of an expert, this know-how has passed from generation to generation of men and women at Tarkett ever since.

Tarkett's history began in the late 1880s in a small carpentry shop in Malmö, Sweden that created parquet planks from local oak and beech trees. Soon this thriving company introduced innovations like the Linderman board - a way of joining parquet strips together to make them easier to install, as well as multi-layer parquet that revolutionized the industry by counteracting the natural movement of wood due to humidity. It's a technique that still forms the basis for the European standard for parquet flooring.

This wood expertise helped drive expansion beyond Sweden in the 1950s to neighbouring markets across Europe by the late 1960s. By 1967, the company had become Tarkett with production still in Sweden – at Hanaskog.

Fastforward to today and the little carpentry workshop has become a major flooring group with manufacturing sites spread across the world. While production has been transformed by modern means, the fundamental knowledge and craftsmanship remain. In choosing Tarkett, you get much more than just a wooden floor. You gain an experience.

FIND YOUR STYLE IN THIS YEAR'S COLLECTION

Discover the natural beauty and variety in our new collection of wood floors developed around the interior design trends and styles of today and tomorrow.

Be inspired by the timeless design and distinctive craftsmanship of hardwood floors with powerful character and special finishing touches. There's a wide spectrum of choice in colour and expression.

NOBLE reinterprets, in a very contemporary modular floor, the long tradition of classic parquet.

ELEGANCE - is an exquisite selection of exclusive wide and long planks. Nature's own design determines their unique character.

PRESTIGE offers a sophisticated, naturally aged look, as if the planks had been left to be weathered by sun, sand and wind.

HERITAGE introduces nature's styling at its best - genuinely rustic oak. Natural details that give floors a feeling of century-old patina.

VINTAGE floors have history. Woodworking traces, from saw marks to indentations, give added personality and a sense of bygone times.

SEGNO proves that classic design can also become the most contemporary when used in the right way.

PLAY is where wood floors get that little bit more creative with added colour and character.

SHADE draws on the colour nuances in our natural surroundings to amplify the depth and texture of your interior design.

PURE celebrates the authentic designs of nature at its best, with extra finishing touches to enhance the unique character of every plank for an ever-lasting style.

VIVA is an easy to install and highly resilient wood floor that will stand the test of time and is perfect for renovation projects.

NOBLE

Noble is a modular floor, inspired by the long tradition of classic parquet.

Noble Oak Bronx - 7806017

Noble is a design that reinterprets a classic modular technique of the 1950s. With brushing and hardwax oil finish it creates a look that changes according to your position and perspective as the light falls in the room. The result is an exciting dynamic between the floor and its surroundings, for an effect that is both timeless and on trend. The extension is a tribute to classic floor constructions with elegant and more contemporary colour and brushing. Each squared lamella is applied by hand to Tarkett's engineered, layered construction. Alternating grain directions, small variations and designed misalignments give every board a flare of uniqueness and exclusivity typical of all handcrafted work. We call it "Perfect imperfection".

Noble Oak Wasa - 7806010

Noble Oak Soho - 7806012

Elegance Oak Champagne - 41008005

ELEGANCE

Exclusive wide and long planks. Nature's own design determines their unique character.

Elegance's wide, extra long, extra thick planks stretch out to shape perspectives and bring a serene ambience to a room. Its natural beauty, with all the cracks and knots of the wood, is enhanced through hand-crafted elements like bevelling. Its hardwax oil finish highlights each plank's distinctive grain and structure. A harmonious combination of design and decoration in a floor that brings depth, beauty and sophistication to any room.

Prestige Oak Granite - 7877054

PRESTIGE

A sophisticated, naturally aged look, as if planks had been left to be weathered by sun, sand and wind.

Prestige celebrates nature's creation and wood's intrinsic strength and power to stand the test of time. Careful brushing enhances the structure and patina of the wood, as though it had been weathered by sun, sand and wind. The effect is a smooth and rustic appearance – like an old wooden bench on a windswept promenade by the ocean, season after season.

Prestige Ash Seashell - 7967018

Heritage Oak Opal White - 41007014

HERITAGE If you seek the authenticity of rustic oak, Heritage is your perfect choice.

Not so long ago, some forms of oak were thought too coarsely grained for flooring. Today, this rustic style with its characterful knots and natural colour variations is highly prized. Heritage's natural features lend the wood a seemingly century-old patina, adding a distinctive touch to your home. Skillful brushing and staining bring out the details that make each board unique.

Heritage Oak Old Brown - 41007004

Vintage Oak Lund - 7877043

VINTAGE

Floors with history. Woodworking traces, from saw marks to indentations, give added personality and a sense of time gone-by.

Vintage combines the charm and detail of old wooden floors with all the benefits of modern flooring for a lived-in look from day one. The worn surfaces you might find in second-hand furniture or salvaged flooring have been recreated. Saw marks, indentations or other distressed details make the floor seem as if it's been walked over for years and years. Add the hardwax oil and each floor will tell you its very own history for generations to come.

Segno Oak Lime Stone - 41020001

SEGNO

The Segno range proves that classic design can also become the most contemporary when used in the right way.

Whether in a modern or warehouse-style rooftop flat, a classic turn of the century apartment or a villa inspired by an Italian mansion, Segno is an ideal flooring choice to enhance your interior style. Revisiting the classic patterned floor with a more modern approach, Segno gives you artistic licence to create your own patterned floor layout, combining our exceptional quality and finishes with a modular format which allows for a wide range of unique pattern options. Whether you opt for a timeless Herringbone pattern or create your own floor 'recipe', Segno can help any space realise its full potential.

Play Ash Ivory Plank - 41006008

PLAY

Make a statement with a series of distinctive, contemporary looks that fuse design with wood's natural aesthetic.

Do you love the feel and texture of wood as well as expressive modern design? Play combines the best of both. A palette of characterful shades forms the basis for a range to lift any interior out of the ordinary. The interplay of striking colours and natural patterns is right on trend, producing a bold, confident look in ash or oak that is original yet won't overpower your room's decor.

Shade Oak Essence Plank XT - 7877050

SHADE

A broad spectrum of wonderfully natural hues that will add character and warmth to your home, whatever your style.

Reflecting the rich variety of colour found in nature's unspoilt landscapes, Shade brings together a host of carefully chosen nuances to transform your interior decor. The different designs will amplify the room's ambience in more ways than you can imagine, whether you prefer bold or subtle textures, dark or light tones. Shade is versatile and stylish enough to create the look you want without compromising on quality or durability.

Shade Oak Soft Beige Plank - 7878023

Shade Oak Italian Brown DuoPlank - 8727013

Shade Oak Soft Beige TreS - 8723030

Shade Ash Linen White Plank - 7967009

Pure Oak Rustic TreS - 8723020

PURE

Letting the wood speak for itself, Pure goes back to basics with a look that highlights the material's inner beauty.

When nature offers you so many different patterns and colours, why let anything else get in the way? From the deep, lush hues of walnut to the gentle glow of birch, this collection draws together six separate species into a range of wonderfully natural flooring styles that will beautify your home. The wood's authentic appearance shines through as characteristic variations in the raw material create the design. Use the true look of wood to set the tone of your decor.

Pure Ash Nature TreS - 7965005

Viva Oak White (1-strip) - 7828013

VIVA

Viva is the perfect choice for your family life, from coping with toddlers to helping students or young couples decorate their first flat.

Ideal for renovation projects thanks to its thinner profile, Viva is a collection of contemporary wooden floors that are practical and durable. Easy to transport, easy to install and easy to maintain with no compromise on aesthetics. The contemporary grey design adds to the range of classic oaks and walnuts.

Viva Oak Grey (1- strip) - 7828014

CHOOSING YOUR PARQUET FLOOR

Wood has an undeniably timeless elegance that appeals to all the senses. Introduced into the home, a wooden floor brings an instant sense of luxury and grandness even to the smallest of spaces. But which one is right for you and your lifestyle? Let us guide you step by step.

WOOD COLOURS

First things first, define your interior design aesthetic. Are you more of a minimalist when it comes to decor or do you prefer your spaces with a more classical look? Lighter woods will bring a sense of airiness and purity that work well with more contemporary, pared back design schemes, whilst darker tones bring a cosier, more rustic and traditional feel. Think of the overall atmosphere you want to create and how much light you have to play with, as the colour of your parquet floor will have a big impact on the finished room.

TOP TIP!

Flooring can make or break an interior. Think about how your parquet will continue to work with your furniture and overall design scheme as it evolves over time.

COLOUR COUNTS!

Darker woods tend to absorb light, creating a feeling of warmth and cosiness that can be especially hard to achieve in a larger space.

The lighter the wood, the more light it will reflect, creating a sense of space and airiness that works particularly well in smaller rooms.

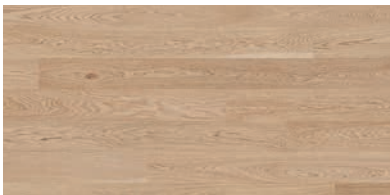

WOOD CHARACTER

Seemingly small details such as grain and colour variations can really change the look and feel of a room so it's important to factor those into your decision. Those variations can be divided into three categories of appearance to help you choose what will work best when it comes to the finished result you want to achieve.

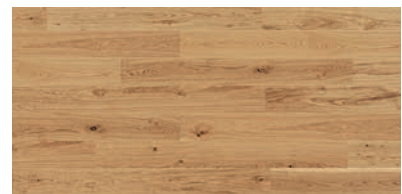

CALM

This appearance presents few knots and less colour variation, which is great for creating a polished **minimalist or contemporary aesthetic**. Try pairing it with features like an exposed brick wall for an industrial loft feel.

LIVELY

Featuring more natural knots and larger variation in colour and structure, this style brings a sense of warmth and comfort to the home, resulting in a **classic, rustic look** that works well with many interior design schemes.

EXPRESSIVE

Our 'expressive' appearance features large knots and cracks with exciting variations in colour and structure. This kind of pronounced character is ideal if you're going for a **bold industrial or cottage feel**.

The character and appearance of parquet floor will have a **big impact** on the **look and feel** of a room.

TOUCH AND FEEL

The colour and grading of your wood floors aren't the only things that can influence the overall feel of a room. Brushing techniques are a great way of enhancing wood's beautiful natural pattern and tying in your flooring into your design scheme.

BRUSHED

This **classic** finish brings out the contrast between the fibres by polishing the wood pattern without going too deep.

7878023

41007002

DEEP BRUSHED

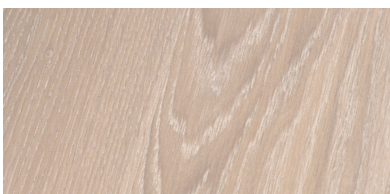

Going slightly deeper, this semi-structural brushing enhances the grain of the wood for a more **rustic** finish.

The texture of a brushed floor creates a **lovely tactile sensation** that's perfectly suited to rooms like the bedroom!

ANTIQUE BRUSHED

Ideal for a **natural feel**, this relatively deep finish plays with the density of the wood and highlights every detail whilst achieving a smooth, soft surface.

7877046

Opting for a parquet with saw marks is a great way to really enhance a vintage or industrial interior design scheme. The added texture and detail bring a slightly unfinished, upcycled look that works really well in any space.

PARTIAL SAW MARKS

A fully random effect, the depth and position of saw marks vary to create a **very natural end result** which can work very well in a more industrial scheme.

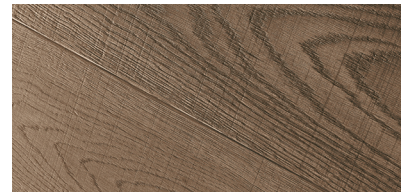

TOP TIP !

Over time, a **floor with surface effects** develops a more weathered-looking patina which adds to the **authenticity** and **personality** of the wood.

FULL SAW MARKS

With a slightly rougher finish, this effect covers the entire width of the board bringing a **rustic, upcycled feel** to your space.

INDENTATION MARKS

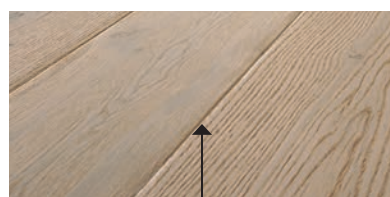

This finish, with natural looking **dents in the wood**, makes it the perfect choice for absorbing and camouflaging wear and tear in high-traffic areas.

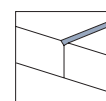

DIFFERENT BEVELS

Depending on how deep or wide it is, a **bevel will add to your floor's character**.

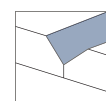

Stick with a shallower micro or mini bevel for a sleeker finished look or opt for a deeper maxi or handmade bevel for an artisanal vintage feel.

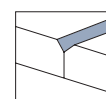

Beveling, either light or deep, **emphasizes the overall plank design**.

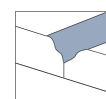

Micro bevel

Maxi bevel

Mini bevel

Handmade bevel

SURFACE PROTECTION

Over time, abrasions, scratches and stains are an inevitable part of every day life, so using the right protection to prevent any damage to the top layers of the wood is indispensable. That's why our wooden floors come with Proteco, one of the strongest protections on the market that will keep your parquet looking its best for years and years to come.

PROTECO LACQUER

This **semi-gloss lacquer** is applied in six layers to make the floor extra hard-wearing and is a great choice if you lead a busy lifestyle and are looking for a wooden floor that requires less maintenance.

PROTECO NATURA

Applied in the same way as the semi-gloss lacquer, this **matt lacquer** is just as hard-wearing and provides equally effective protection. It retains the natural colour and feel of the wood, just like an oiled floor. However, bear in mind that it requires a little more care, as a matt surface always attracts more dirt than a semi-gloss one.

PROTECO HARDWAX OIL

The oil penetrates into the wood whilst the wax remains on the surface, providing **extra wear protection and a silky matt finish**. Requiring slightly more care than a lacquered wooden floor, it must be 'maintenance-oiled' every two or three years. Well taken care of however, it remains looking beautiful for years to come.

CARE & MAINTENANCE

A beautiful wooden floor is a labour of love and the way in which you look after it will help to keep it looking its best for years and years to come. Think about how much time and effort you're willing to invest as this can play a big role in your decision.

DAILY CARE

We recommend you vacuum or clean your wooden floor with a dry mop.

The Tarkett Wood Floor Care Kit for lacquered floors is perfect for this thanks to its comfortable design that includes a telescopic handle, a microfiber cloth and a Velcro fastener. You may need a little liquid to remove tougher dirt and stains, but be careful not to use too much water.

SOLVING PROBLEMS

Don't worry if you drop a cup or get a scratch in your floor, **Tarkett has several products for you to make spot repairs**.

Repair Kit

Should an accident happen, help is at hand. Our repair putty comes in a wide spectrum of colours. Seal with repair lacquer included in the kit.

Oil Repair Kit

Our repair kits are colour-matched to our oiled floors and include oils, brushes and sanding papers that, together with a little time and effort, will take care of any scratches or blemishes to your hardwax oiled floors.

CONSTRUCTION IS KEY

A wooden floor is a living, natural material that shrinks or swells depending on **temperature and humidity** which can cause the wood to crack or become warped. **With over 130 years of experience, Tarkett knows how to minimize these unwanted effects which is why our wooden floors are built up in three layers.**

By alternating the direction of the fibres in these layers, movements in the wood are minimized, creating a balanced, stable floor whilst our strong glueless locking systems lock the boards tightly against one another without any gaps.

TOP TIP !

To ensure your floors always look their best, wipe up any water spills as quickly as possible. Sweep away dust and dirt on a daily basis and avoid using steam, wet mops, furniture polish or abrasive products.

A FLOOR FOR EVERY ROOM

Given that we spend most of our time indoors, it's no secret that inviting nature into the home can have positive, long-lasting effects on our wellbeing. A wooden floor creates a comfortable oasis of relaxation that can help you recharge after a long day. But the type of finish you choose and how easy it is to maintain should be adapted to your lifestyle. Ultimately, the right type of parquet floor is the one that is most adapted to the room's usage.

LIVING ROOMS

This will probably be the biggest room in your house so why not make it the centre of attention? Oak and walnut work well in both a modern and a traditional setting, making them a popular and versatile choice when it comes to interiors. If you're looking to make a bold design statement with a lot of character, go for an **oiled floor** which will age with style. Patterned floors from our Noble and Segno ranges are also lovely choices for a living room as they interact beautifully with the light, enhancing the wood's structure. Looking for something more low maintenance? A **lacquered floor** is easy and quick to care for.

BEDROOMS

The bedroom should be a soothing oasis of calm. Wear and tear isn't as much of an issue as you'll mostly be walking barefoot or in socks so opt for a **brushed, hard wax oiled floor** to really bring out the natural beauty of the wood.

TOP TIP !

Prevention is better than cure! Use **felt protection pads** on the feet of your furniture to further protect your floor and keep it looking its best for longer.

WHAT IF...

You have a big family or like to entertain

If you have children, pets or constantly have guests over, remember that entrance mats or rugs in high traffic areas such as hallways are a great way to collect any dirt and moisture that can potentially damage your parquet.

You work from home

Remember to protect the floors of your home office or study from the wear of castor wheels and mobile furniture.

KITCHENS

This is often the heart of the home, so think **super resistant and easy to clean** when it comes to finish! A **lacquered floor** is perfect for this type of high-traffic area as it stands up to everyday wear and tear.

KIDS BEDROOMS & PLAYROOMS

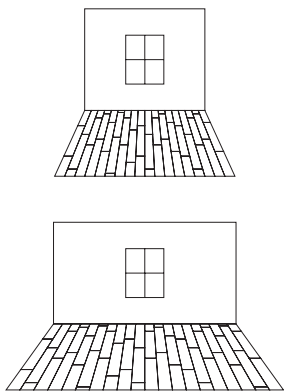

Kids will be kids! Make sure your floor is equipped to prevent indentations from dropped toys and other high-energy activities with a hard veneer floor like the ones from the Viva range. **3-strip, 2-strip or mini planks** are a good way to make these smaller rooms look their best as they help to visually balance out proportions.

INSTALLATION

Parquet can transform a room making it appear anything from larger to narrower and even more majestic, so the direction in which you lay your boards will have a big impact in the way you perceive the size and shape of the room.

CHOOSING THE SIZE OF YOUR PLANKS

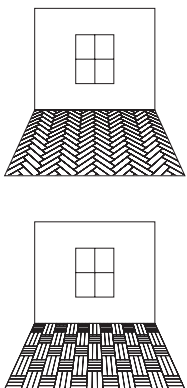

Smaller rooms will benefit from planks laid lengthways or horizontally to elongate the space, whilst **bigger rooms** can handle larger, wider planks that can bring a regal feel to even the simplest of decors.

CHOOSING YOUR LAYING PATTERN

Classic patterns such as the Herringbone or English pattern are characteristic of old buildings in Berlin, circa the turn of the century, and bring **a sense of heritage and grown-up elegance**.

Sectioned patterns with **parallel layouts** have an **ultra-modern feel** and are great for rooms with a pared back, minimalist aesthetic.

PARQUET FLOORING IS EASIER THAN IT LOOKS

If you've been putting off your dream wood flooring for a while because you're worried that the installation process will be too complicated, think again. Our ranges offer simple and practical solutions adapted to every skill level, but whatever method you use, it all begins with preparing your sub floor for installation.

2-LOCK

Super **quick and easy**, the 2-lock makes it simpler than ever to lay wooden floors. The secret is a **small spring** at the end of each floorboard which locks the board to its neighbor when pressed down. Lay a floor in an average size room in less than a day by following the instructions for floating installation.

Most of our ranges come with this type of installation method.

ULTRALOC

Time effective and mess-free, this system is perfect for beginners thanks to its simple horizontal connection. It is perfect for renovations. The secret lies in its 8.5mm thickness which allows you to install it on top of an existing floor without having to change door frames.

GLUE DOWN INSTALLATION

Ideal for creating patterned parquets, the **Segno** range features a tongue and groove system for glue down installation. This requires some carpentry skills to achieve the desired result so if you're a beginner, make sure you have a professional on hand. Our super wide **Elegance** planks are also available with the same tongue and groove system.

Our installation methods are designed to make parquet flooring accessible to everyone, from **beginners to expert carpenters**. Chances are, you probably already have all the tools needed.

Visit tarkett.com for all installation recommendations.

PERFECT IMPERFECTIONS

When it comes to the **Noble range**, alternating grain directions, small variations and intentionally designed misalignments give every board a unique air that's typical of all handcrafted work.

Give yourself artistic licence to experiment! Select boards from different boxes and play around with the transitions and natural colour variations in the wood.

THINKING ABOUT UNDERFLOOR HEATING?

Underfloor heating can bring a real sense of comfort to the home, but there are a few things to keep in mind. Firstly, it is essential that the surface **temperature never exceeds 27°C** and that the chosen system distributes heat **equally throughout the entire floor surface**.

Some wood species are also more prone to movement and therefore are not recommended for underfloor heating as changes in temperature can cause gaps between floorboards in the winter.

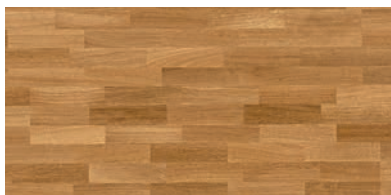

To find out more about whether your chosen parquet is suitable for underfloor heating, read our product guide on www.tarkett.com

WOOD SPECIES

We source the majority of our woods from sustainable forests in Sweden and Finland where sparse planting and slow growth in the Northern hemisphere leads to strong and stable trees. We use the whole log to create our boards in three layers, employing the Northern wood for the middle and bottom layer for added stability and strength. The grain and pattern are what form the design, making for beautiful, distinctive floors that exude a natural warmth.

OAK

Exceedingly strong, heavy and durable, oak has an attractive light colour with a prominent grain. As it **matures**, its colour changes and becomes **more golden** !

ASH

Strong and durable, ash is generally light in colour with a fairly straight grain. Over time, **ash acquires a warm golden tone** !

But what about our **other wood species?**

MAPLE

Varying in colour from cream to dark red, maple tends to have a straight, delicate grain. When exposed to sunlight, maple turns darker and golden.

BEECH

Strong and durable, beech is resistant to abrasions and ranges from white to pinkish brown in colour with an attractive fine grain. In terms of colour changes, beech will go from red to golden tones.

BIRCH

Fine-grained and pale in colour, this light Scandinavian wood boasts an attractive sheen. With time, birch turns darker and more golden.

WALNUT

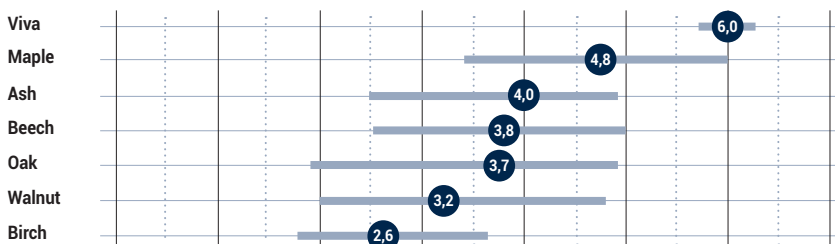

Hard, heavy, and resilient, walnut comes in a range of warm hues ranging from light brown to dark chocolate. Colour-wise, walnut's brown hue can become reddish over time.

The Brinell test measures the hardness of a wood by pushing a small steel ball against the surface of the wood using a heavy load. Its Brinell number is then determined by the size of the indentation made. The higher the Brinell number, the harder and more resistant the wood.

The numbers shown here are averages based on several tests.

BRINELL HARDNESS SCALE

Doing good. Together.

Tarkett has produced wooden floors since 1886. As one of the world's largest flooring manufacturers, we have a responsibility to ensure that our operations are driven with a focus on long-term sustainability.

We want to do good. Fulfilling a need for wooden floors that are beautiful to look at but also have a positive impact on people and the planet. We believe in close collaborations, encouraging our customers and all of our stakeholders to join us in working toward positive change - together. When it comes to sustainability at Tarkett, our motto is, 'Doing Good. Together.'

DESIGNED FOR LIFE

Our authentic wooden floors are designed by nature, we just lend a helping hand by shaping them into **beautiful, durable and long-lasting floors for your home.**

We want our floors to contribute to creating good indoor air quality resulting in **healthier people-friendly spaces.** Because of this, all of our floor coatings are solvent-free with very low levels of emissions that fall well below the strictest European standards.

During its lifetime, the floor is designed to be **easily cared for** by you with gentle and moist/dry cleaning methods.

Our floors are durable and as they age, they can be restored and given a new lease of life. Tarkett parquet flooring is made to be re-sanded and re-lacquered or re-oiled. Combined with Closing the Loop, **this largely contributes to a sustainable use of our natural resources, with an extended carbon storage effect.**

CLOSING THE LOOP

Tarkett's wood flooring is made from **97% real wood**, one of the world's most renewable raw materials

Our factories are located in Europe in areas with a **close connection to the forest.** A vast majority of our wood raw material comes from well-maintained forests in Sweden and Finland where growth exceeds logging.

All production waste from our wooden floor manufacturing processes is **recycled as a source of energy in our factories.** Surplus waste is sold as raw material to other industries to be recycled as a source of energy and/ or biogas.

Worn-out wood flooring has so far mainly been used for recovering energy. Now, the journey of **recycled** raw materials from old worn-out floors starts out as new product development alternatives.

We have also started the journey to get all of our product ranges **FSC® or PEFC™ certified or produced from recycled wood.**

DRIVING COLLABORATION

In order to do good and be a responsible partner, Tarkett works in **close collaboration** with customers, suppliers, research institutes, government and international organisations.

We also work with the global organizations that promote **sustainable forestry** and biodiversity and primarily partner with suppliers that are already certified.

Accordingly, we strongly support new suppliers to promote sustainable forestry by including themselves in 'Chain of Custody' certifications. Today, over 60% of our wood is FSC® or PEFC™ certified.

We have a continuous and close dialogue with the eco-labelling and environmental assessment institutes to meet the needs of our local markets.

Tarkett's product labelling provides transparent information about **the origin of the materials** used in our products.

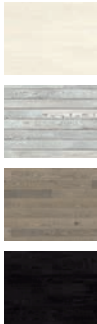

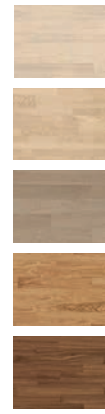

Doing Good. Together.
Every day, we strive to improve people's lives,
preserve natural resources and respect our environment.

ACCESSORIES

Everything you need to make your newly installed floor even more beautiful, practical and durable.

- 1 Colour-matched reducers provide a transition between two wooden floors or with other flooring solutions like tiles or carpet.
- 2 When installing over large areas, an expansion gap is required. Tarkett's transition accessory is the perfect choice.
- 3 Skirtings are used to hide the floor's expansion gaps. We offer a wide range of colours and designs tailored to your needs.
- 4 Colour-matched, seamless stair nosings create a modern look. Find out more on the next page.

The stair nosing's colour and surface effects form a seamless match with the adjacent stair, retaining the wood's natural feel and subtle variations in tone.

Vintage Oak Chester		8795039	8795239
Vintage Oak Salamanca		8795040	8795240

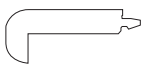

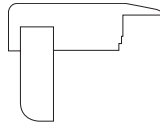

Only to be used together with a floating floor installation to allow movements.

For the best results, use a professionally-trained installer. (Staircase installation instructions available at www.tarkett.com).

When ordering stair nosings, please bear in mind that a typical staircase is 900 mm wide with 14-17 steps.

As our stair nosings have the same composition as our standard floors, you can use the maintenance and technical data sheet for the relevant floor. All stair nosings are treated with hardwax oil and will require regular maintenance.

To give your installation the final touch, we recommend our hardwax oiled floor repair kit.

The pictures only present the colour of the floor. For more details regarding grades and variations, check Tarkett Grading Book or www.tarkett.com. Although every care has been taken to reproduce images that reflect the finished product, the quality of monitors and printers and the very nature of wood may result in variations in the colour and structure of individual planks. Tarkett's international range of wooden floors comprises many different products. Some of these may not be for sale in your country.
